FITTING THE CLEANSPACE™ MASKS: A GUIDE

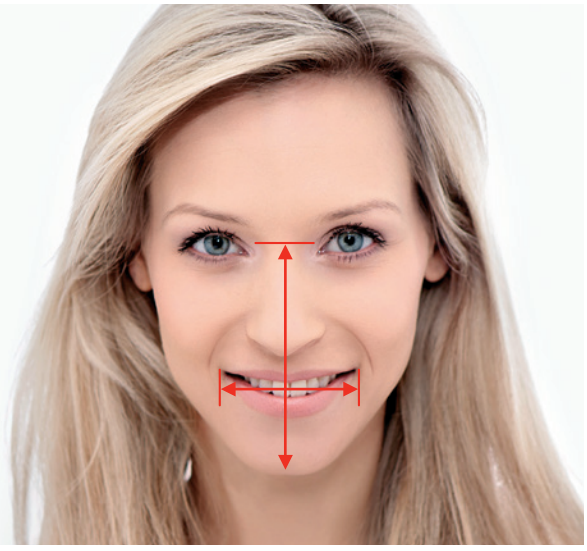
The CleanSpace™ masks and PAPR system is easy to fit and use. It is important that your mask is the right fit for your face and seals correctly. **Mask fitting should be done by a specialist or designated mask fitter.** The fit must be confirmed by a quantitative fit test performed according to Respirator Protection Standards in your territory.

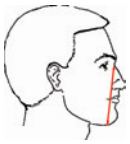
ALL CleanSpace Masks can be portacount tested using the **CleanSpace PortaCount Adaptors.**

MASK CODE	NAME	DESCRIPTION	WEIGHT
PAF-0033	CleanSpace H Series SMALL	HALF MASK SMALL	125g
PAF-1010	CleanSpace H Series MEDIUM	HALF MASK MEDIUM	125g
PAF-0027	CleanSpace H Series LARGE	HALF MASK LARGE	150g
PAF-1014	CleanSpace Full Face Mask MEDIUM / LARGE	FULL FACE MASK MEDIUM / LARGE	700g

SELECTING YOUR SIZE FOR THE HALF MASKS

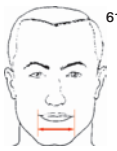
This is a guide to selecting the half mask most likely to fit you. Ensure masks are fit tested by a specialist before use.





FACE LENGTH	34.5mm	43.5mm	52.5mm	61.5mm
133.5mm	First try: MEDIUM* Then try: LARGE	First try: LARGE Then try: MEDIUM	First try: LARGE Then try: MEDIUM	
123.5mm	First try: MEDIUM Then try: SMALL*	First try: MEDIUM Then try: LARGE	First try: LARGE Then try: MEDIUM	
113.5mm	First try: SMALL Then try: MEDIUM	First try: MEDIUM Then try: SMALL	First try: MEDIUM Then try: SMALL	
103.5mm	First try: SMALL Then try: MEDIUM	First try: SMALL Then try: MEDIUM	First try: SMALL Then try: MEDIUM	
93.5mm				

LIP LENGTH



* On narrow faces, the action of pulling on the arms of the mask to tighten it causes the height of the mask to increase. The narrower the face, the more likely a smaller mask will be a better fit.
